VELA metal body, metal / hpl / mfc doors

Body:

METAL - Powder-coated galvanized steel

Doors:

METAL - Powder-coated galvanized steel
HPL - High pressure laminate
MFC - Laminated chipboard

Prepared for **Smart Locker**

page 17 →

Description:

In the competitive market of metal lockers, many companies promote their products primarily based on price. However, the lowest price does not necessarily align with quality.

VELA lockers are available at a competitive price, but our priority in their design was to ensure quality and durability better than that of other manufacturers. We aimed to guarantee long-lasting, trouble-free use, which in the long run is more cost-effective than purchasing the cheapest products that quickly deteriorate.
The bodies are always made of galvanized steel, with adjustable legs and durable accessories like those from our higher-end locker models. The ventilation system helps to avoid unpleasant odors and moisture buildup inside the locker, which is particularly important in schools and changing rooms where shoes and clothing are stored.

VELA lockers meet all legal requirements and are recommended with full confidence.

- fully assembled product
- employee lockers - standard vertical partition
- reinforced metal doors
- easy to clean

Quality confirmed by certificate

Budget solutions

Even gaps between the doors

Locks for lockers

Security - a common value of the locks we offer, that is why we only provide those from reputable manufacturers. Below, we describe three additional features that guided us in selecting the locks for our products.

Waterproofnes - prepared to work in any conditions.
Prioritizing quality above all, we have decided that all locks offered by us are suitable for use in moist areas.

Interchangeability - lock models can be exchanged at any time, changing from a lower model to a higher one. This way, the locker room can be modernized without the need for costly door replacement. When changing locks to deposit or electronic locks, additional holes will have to be made in doors.

Availability - don't waste time waiting.
A strong aspect of our offer is the availability of locks on stock, significantly reducing the time needed to complete the order. For projects with slot or digital locks above 200 compartments, please contact us to confirm availabilit .

Cam locks, the locks we offer have a 1/1000 combination, meaning the chance of opening with your key any another locker is 0.1%.

Padlock locks, an alternative to key locks is padlocks. The recommended shackle diameter for padlocks is 5-7 mm.

The option to use any lock.

We are not limited to our own selection; we can integrate the locker with any lock specified by the client.

Code locks are maintenance-free solutions. All code locks offered by us have a master key opening option in case the code is forgotten.

Deposit locks, Coin-operated or token--operated locks are capable of accepting coins or tokens into a special container. Locks can operate on coins of 1/2 EUR. In case of key loss, locks can be opened using a master key.

Electronic lock that support the standard RFID are modern programmable locks operated by CARDS, WRISTBANDS, or other RFID TOKENS. Available in both OFFLINE versions powered by batteries and ONLINE versions powered externally.

back

SMART LOCKER transforms lockers into solutions

ALSANIT introduces innovative solutions in the field of lockers with smart locks, enabling electronic control over them.

Thanks to cooperation with the renowned brand SMART LOCKER, representing the most advanced intelligent locking system available on the market, we can confidently offer this solution to our customers.

SMART LOCKER stands out not only for its ease of use but also for its rich configuration options, ensuring easy management and convenient use.

The possibility of integration for any ALSANIT locker system

Full service including installation and training

The ability to integrate with the client's database

The ability to customize the software to individual needs

SMART LOCKER is an intelligent locker system that introduces a new era of facility management.

Examples of applications by industry
