Strong Polish and European brand

About us

With passion and commitment, we have transformed a small family business into a leading European provider of equipment for investments. We can proudly say that the products we offer, which are designed and manufactured in Poland, are highly regarded in the most prestigious facilities worldwide.

We back the expertise of our professional team with the latest design and production technologies, which allows us to shape our company and deliver over 2600 projects annually.

Today ALSANIT is recognized on the market as a brand appreciated primarily for the exceptional quality and innovative design of offered products.

Our company continues to grow and deliver products that meet the highest standards, which makes us a trusted partner for customers globally.

ALSANIT IN NUMBERS:

20+
20 years of experience

25+
sales to over 25 countries

2600+
2600 projects annually

8000+
sqm of ALSANIT's hall space

40000+
doors produced annually

Mission

Our mission is to deliver the highest quality products designed for investment equipment. We aim to be a company whose products are confidently recommended and utilized worldwide.

Vision

We strive to set trends and participate in shaping the spaces of newly built facilities. Our products are designed to prioritize the users, ensuring they best meet their needs.

ALSANIT - WE CREATE SPACES

Our values:

Competences

We serve you with the knowledge and experience gained through the execution of various projects. We know how to assist our clients.

Creative thinking

It is primarily manifested in the individual approach to each client. Our goal is to provide the best possible response to every inquiry. Creative thinking is also the foundation for creating new product lines and accessories.

Order

High service standards, as well as a perfect organization of the production process at ALSANIT, are indispensable norms for maintaining a high position in the market, which requires punctuality and efficiency in order fulfillmen

Cooperation

We prioritize cooperation, both internally among employees and externally with suppliers and clients. We ensure that clients receive support from the first contact through offer and during installation. We appreciate loyal customers by offering them participation in partnership programs.

Reliability

Understood as punctuality, high quality of delivered products, and very good relationships with clients. Reliability is a particularly important value that we manage to achieve thanks to order and cooperation. Reliability guarantees customer satisfaction both with products and services provided.

Professional customer service

We explore the needs of your business

Each project is supervised by an individual coordinator who not only advises on the appropriate selection of materials and construction regulations but also ensures that everything runs smoothly and according to plan.

For us, the greatest reward is the success and satisfaction of our clients. By working with us, you receive not only a product but also a business partner.

High quality at an attractive price

By focusing on quality, we are mindful of the importance of being competitively priced. We invite you to submit your inquiries.

Short lead times

Timely and comprehensive service – from delivery to installation, allowing you to focus on other aspects of your business.

Dedicated customer service representative

Offers prepared within 48 hours, technical advice, and full information regarding the progress of the order.

Project support

A qualified team of designers capable of creating visualizations to support project implementations.

OUR PRODUCTS HAVE BEEN CHOSEN BY:

TESLA, SKANSKA, DublinAirport, CITYFIT, Hilton, zalando, IKEA, amazon, HEINEKEN, BOSCH, SAMSUNG, KFC, DELL, castorama, LG, aquapark, dpd, Pfizer, ORLEN, VW, MAN, Mercure, Mars, nh HOTELS, MICHELIN, PANATTONI, BURGER KING, LIDL, STRABAG, MARRIOTT

From project to realization

Products tailored to the needs of each investment

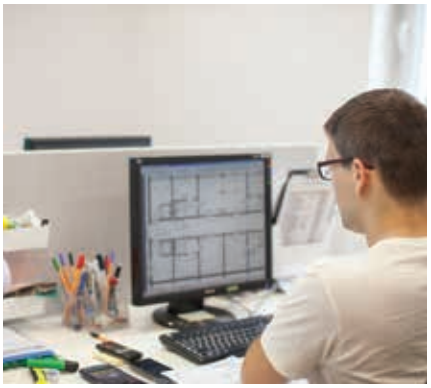

Thanks to advanced technological capabilities and deep material knowledge, we offer a wide range of solutions for every investment. Basing on our experience, we select products that perfectly fit various facilities. With us, you have the opportunity to benefit from a comprehensive offer and enjoy the convenience of working with a single supplier - ALSANIT.

Tested solutions

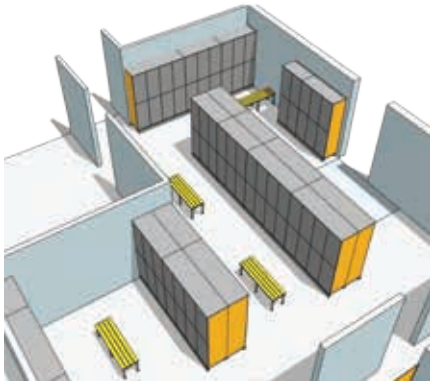

We test our products and conduct regular quality assessments to ensure their highest quality. The provided warranty is a specific commitment, supported by the necessary approvals and certificates of our products. The certifications and approvals held by ALSANIT are recognized internationally.

With users in mind

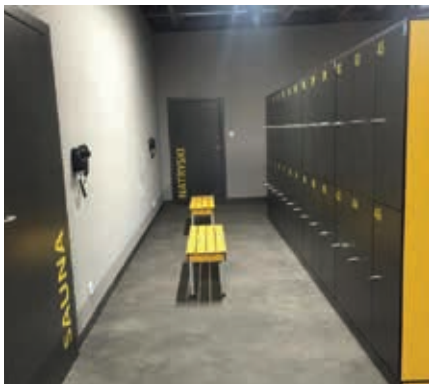

We understand that the most important aspect in our industry is the human. Our solutions are based on analyzing the needs of users and observing their interactions with the provided products. Each project is a source of knowledge and insights for us. Based on this, we continually improve and expand our offer.

We know that behind every successful project lies great cooperation. Our manager will help unleash the full potential in your projects and ensure the delivery of the necessary technical documentation for ALSANIT products.

Benefits of cooperation

3D models library

We offer free design libraries, such as BIM, CAD, and SketchUp, containing models of our products.

Material samples

We have prepared samples of the materials used in our products.

Technical documentation

We provide comprehensive technical documentation, precise visualizations, and also customize products to individual needs.

One supplier of many products

We understand the requirements of architects, which is why we have such a comprehensive offer. We deliver products on time and ensure high-quality execution.

Access to informational materials

Easy access to product catalogs, technical specifications, and drawing libraries.

Certificates

Our products hold international certifications
TÜV – lockers,
CE – cubicles.

ALSANIT - QUALITY AND PASSION

Innovative products and production methods

Quality assurance through patents and certification

Our products are backed not only by experience and professionalism but also by specific certifications and attestations, confirming their quality and safety. We hold necessary hygiene certificates, European Technical Assessments, and CE certificates issued by the renowned Institute of Building Technology and TÜV certificate

We continuously strive for innovation. We independently develop and manufacture fittings and accessories for our products. We are proud to have designed a unique hinge that is now used in all our locker systems.

Our spirit of innovation is underscored by our patents and protected designs. Among them, it's worth mentioning:

- The revolutionary SAFE FINGERS system, enhancing comfort and safety of use.
- Innovative set of profiles for loc er production, providing unlimited configuration possibilities
- Modern system of metal modular lockers, combining aesthetics with functionality.
- Our proprietary ALSANIT hinges, which are the epitome of durability and reliability.

Each of our innovations is a response to market needs and a pursuit of excellence.

In-house carpentry workshop

- Automatic sheet warehouse with a capacity of 30,000m2,
- 4 CNC machining centers,
- 2 edgebanders using hot-air technology (glue-free).

In-house metal sheet processing line

- Automated sheet metal cutting line,
- 2 robotic CNC bending presses,
- welding stations.

In-house machining department

- 2 CNC lathes with automatic loading system,
- double-table CNC milling center,
- automaited saws,
- CNC profile cente ,
- 3 eccentric presses.

Production management application

We have developed and implemented an innovative workflow system, which ensures efficient and fast order fulfillment

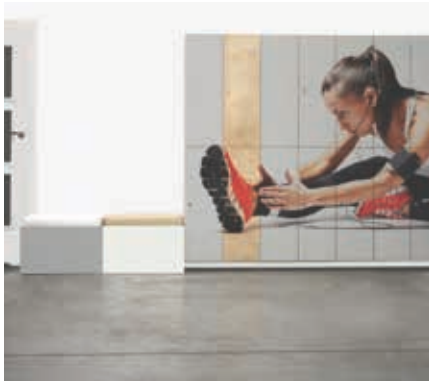

In-house painting line

Highly efficient fully automated paint line with automatic paint applicators.

In-house assembly department

A properly executed installation by experienced teams is the finishing touch to completing the project perfectly.

In-house design department

For business clients, we provide visualizations included in the project price.

In-house engineering department

A team of experienced engineers capable of executing the most ambitious projects.

We are navigating towards modernity: we are growing and investing

Continuous investment in technological development and modernization of the production process is key to ALSANIT's success. Our modern machinery park is the foundation upon which we build efficiency and the ability to adapt to the individual needs of the customer.

Thanks to advanced technology, custom products have become commonplace for us, and their realization is done while maintaining the highest quality standards. Furthermore, the innovation of our machinery park allows for the streamlining of production processes, resulting in the quick fulfillment of orders, even the most specific ones

We proudly observe how our determination to strive for excellence translates into products that meet both current and future market needs. Our readiness for continuous improvement ensures that ALSANIT will remain at the forefront of the industry, offering solutions that meet the expectations of even the most demanding customers.

Short lead times

7
standard production lead time for orders - below 10 doors

10
standard production lead time for orders - approximately 10-20 doors

14+
for larger projects, the time is determined individually

Masters of process optimization

What sets us apart is not only our short lead times, but the entire integrated process of operation. Through closely monitoring each stage of production, automation, and eliminating unnecessary factors, we have achieved a level of efficiency that is difficult to beat

As one of the few companies in the industry, we have automated warehouses for resources such as HPL boards, MFC boards, and accessories.

By having necessary materials in stock, we can fulfill orders without the risk of delays from subcontractors. This allows us to react promptly to customer needs and deliver products exactly when they are needed, adhering to the philosophy of JUST IN TIME delivery.

The future is us

In today's world, advanced technology and an experienced team are just the beginning. The secret to competitive advantage is the ability to integrate these two elements into a harmonious whole.

What sets ALSANIT apart from other companies is our innovative approach based on network-centric solutions. In practice, this means that information entered once is shared in real-time across various workstations. This accelerates processes, minimizes the risk of errors, and ensures consistency at every stage of operation.

At ALSANIT, we don't wait for the future – we create it.

DOOR-TO-DOOR DELIVERY

ALSANIT MANAGER

The ALSANIT MANAGER application is the digital essence of efficienc . It revolutionizes the way your order is processed. Designed and created internally by our IT team, it is evidence of our commitment to the latest technologies.

All our machines and workstations are integrated with an advanced information circulation system. The heart of this system is ALSANIT MANAGER, which provides us with real-time data at every stage of production.

This digital transparency guarantees us and our clients full awareness of the progress in project execution. This makes us not just a manufacturing company; we are pioneers in implementing modern IT solutions.

Delivery without compromise

At ALSANIT, we place great emphasis on the comfort of our customers. That's why we offer „door-to-door" delivery. This ensures that ordered products will arrive safely and intact to any location.

We strive to tailor each delivery precisely to the needs and expectations of our partners. For those who prefer their own transportation, we have prepared the option of personal pickup. Simply contact our logistics department in advance to arrange a convenient pick up time.

Full comfort of assembly service

At ALSANIT, we prioritize comprehensive services. In addition to delivering top-quality products, we also offer optional installation carried out by our authorized teams.

Our installation teams, equipped with specialized knowledge and practical experience, ensure precise and reliable service. This provides you with the assurance that ALSANIT products will be installed according to the highest industry standards.

Ecology

We respect nature in every action

ALSANIT is not just a business but also a responsible participant in the ecosystem. Understanding the importance of sustainable development runs through our entire operation - from product design to implementation. We don't limit ourselves to maintaining the environment around our company in a ‚green' state. At every step, we prioritize the use of ecological materials and environmentally friendly technologies.

Our commitment to environmental protection is not a one-time effort. We systematically expand our knowledge in the field of eco-design, while also promoting an ecological approach among our clients. An example of our pro-environmental attitude is the implementation of solutions based on photovoltaic energy, which contributes significantly to reducing CO^2 emissions. We strive to become a role model in terms of ecological business practices.

We develop while caring for the environment

In our business strategy, we emphasize sustainable management and the best use of available resources. This approach is not only our choice but also our obligation to future generations.

We take pride in using materials that hold prestigious certifications such as FSC, PEFC, and GREENGUARD, indicating their minimal environmental impact. However, our innovation doesn't stop at materials.

The modern technologies we introduce into our production process ensure not only excellent product quality but also low energy consumption of our machinery.

By producing key components like fitti - gs and accessories in-house, we significantly reduce our company's carbon footprint. But our eco-friendly efforts don't end there. The Sustainable Supplier certificate we possess underscores our commitment to responsible waste management - from creation to safe disposal. We act with ecological balance in mind, delivering products of the highest quality.

Three words of great significanc

The principle of REUSE, RECYCLE, REDUCE has been accompanying ALSANIT since its inception.

REUSE - All our actions strive to maximize the use of materials generated during the production and cutting of our products.

RECYCLE - By avoiding the waste of potentially useful materials and reducing the consumption of available resources, we significantly reduce energy consumption, air pollution, and water pollution. Post-production waste, if it cannot be reused, is sorted and sent for specialized disposal.

REDUCE - The company's policy focuses on saving materials and, consequently, in the long term, reducing emissions.

ALSANIT places great emphasis on ecologically sustainable design of its products and the innovation of applied solutions. ALSANIT lockers, based on modular construction of the bodies, can be supplemented with accessories or have their configuration changed even after delivery to the customer. In this way, we significantly extend the product's lifecycle and truly reduce the amount of waste. This is how we believe true ecology should look like.

WE HAVE PANELS COVERING 40% OF ENERGY NEEDS

LOCKERS AND BENCHES

When designing our lockers, we innovate to ensure our products set new trends and stay one step ahead of the competition.

Our patented modular locker system is one of the best in the world.

The COMBO lockers are the result of years of experience and creativity. They retain the lightweight metal body while the modular design significantly enhances their durability and allows for fl xibility in terms of shape and color.

COMBO

reddot winner 2025

COMBO

COMBO modular, hpl / mfc / glass doors

Body:

METAL - powder-coated galvanized steel

Doors:

HPL - High pressure laminate
MFC - Laminated Chipboard
GLASS - Tempered glass

Prepared for **Smart Locker** page 96 →

PATENT OFFICE OF THE REPUBLIC OF POLAND

Patent
P.434877 (lockers)
Protected design
WP.30407 (hinge)

Description:

The COMBO lockers combine the best features of products available on the market. They have the lightness typical of metal bodies, while the doors, being the most exposed to wear, are made of durable materials.

The locker bodies are always made of galvanized steel, coated with powder paint. The doors use materials available in various decors and structures, allowing for the creation of unique designs.

Thanks to the patented modular construction, the possibilities for locker applications are practically limitless. The body can be customized even after delivery to the destination. Changes to the interior equipment, dimensions, opening direction, and even door material are possible.

Combining durability with elegance and competitive pricing - COMBO lockers are, in our opinion, the perfect choice.

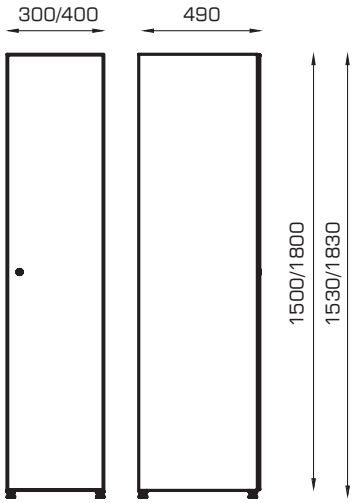

- only Torx screws are used
- fully assembled product
- the possibility of custom built
- easy to clean

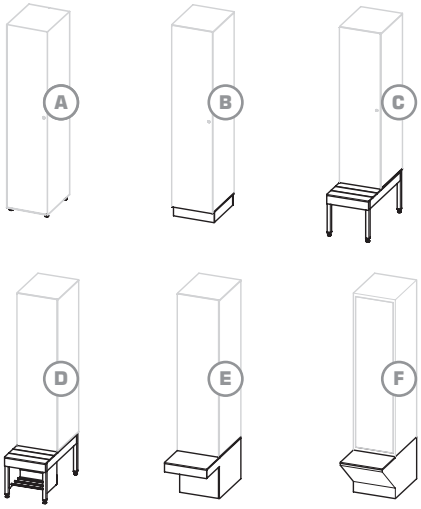

reddot winner 2025

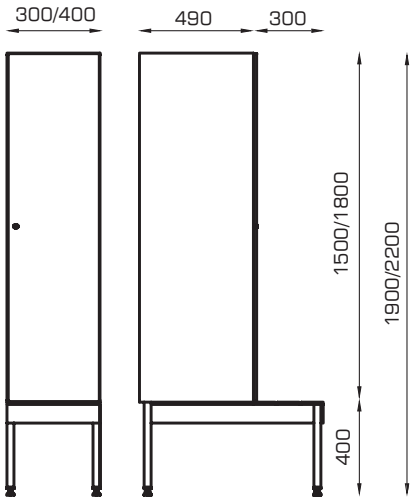

- **Quality confirmed by certificate**
- **Flexibility for changes at any time**
- **Even gaps between the doors**
- **Full-overlay doors**
- **Eco-design according to the concept of REUSE**

Patented modular construction - a worldwide innovation.

Modular construction means that the equipment, and thus the functions that the locker serves, can be changed over time. Therefore, it is a very economical solution in the longer term.

The concept of REUSE - redefining ecology.

Thanks to the possibility of adapting lockers according to needs instead of replacing them with new ones, it's possible to customize the current ones. This is achievable, among other things, due to galvanized bodies, which significantly increase the lifespan of the product.

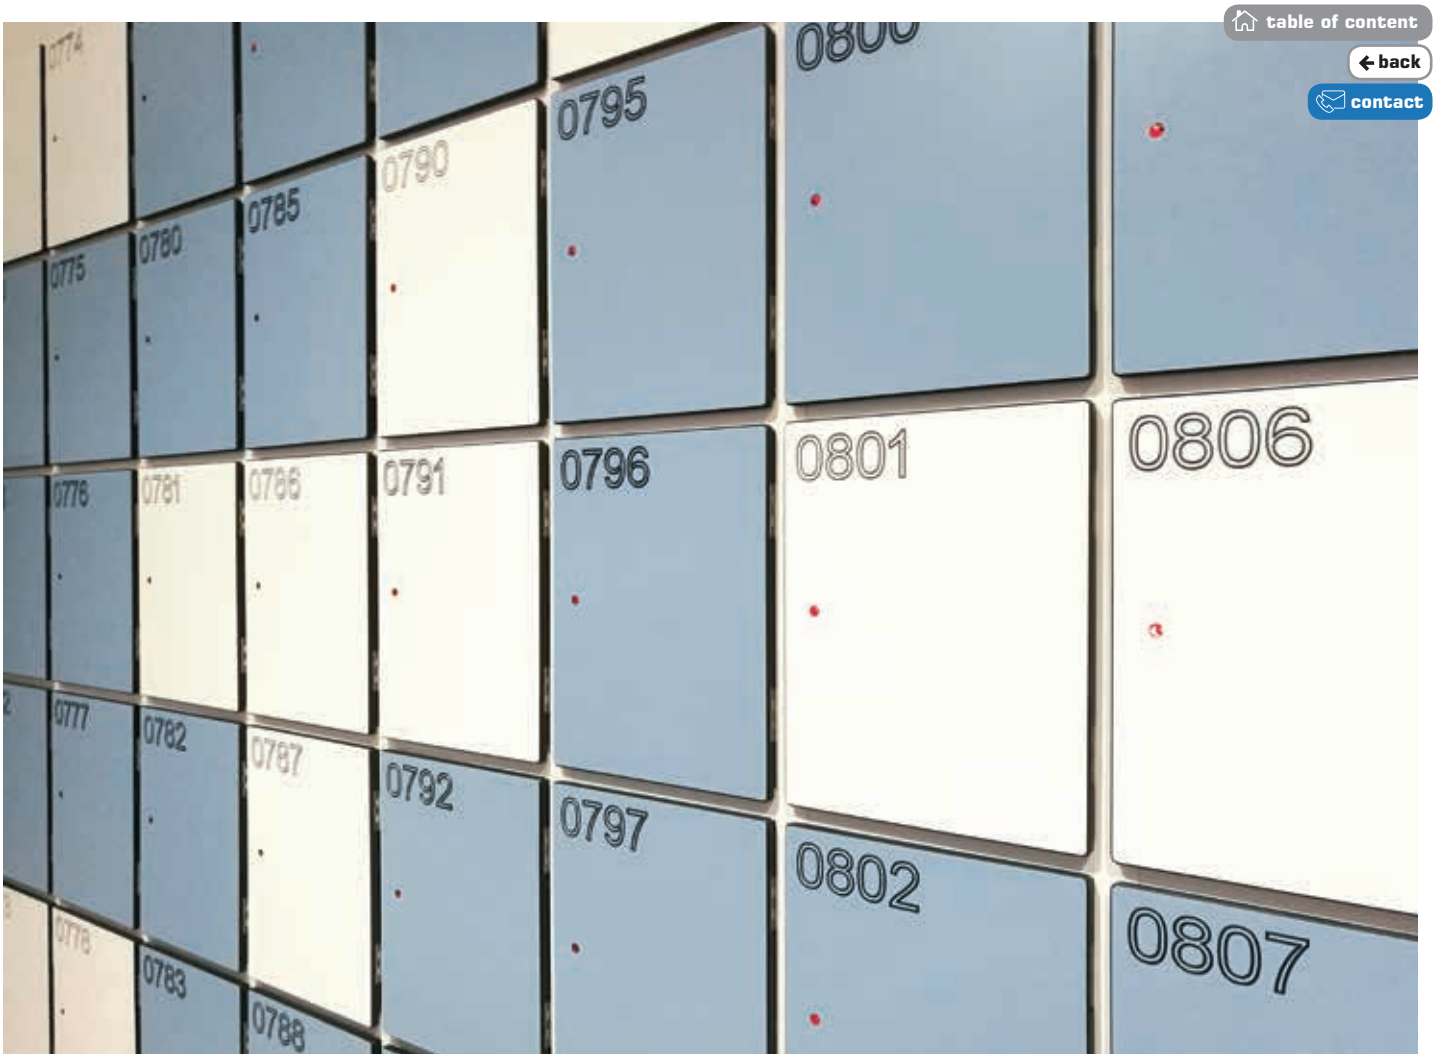

Doors available in multiple materials.

Thanks to the fact that the fronts can be made of HPL, GLASS, METAL or MFC, they will perfectly fit the style and budget of any investment.

Description:

HPL panels are a modern material of the 21st century, characterized by exceptional durability, waterproof properties, and antibacterial features. When investing in clothing lockers, customers expect years of durability, and no other material provides such excellent longevity and functionality.

HPL lockers perform exceptionally well in extreme conditions, for example, in food processing plants or swimming pools, where aggressive environments and continuous user rotation cause high impact on the lockers.

HPL panels are offered in natural decors and textures such as stone, concrete, or wood, allowing for the creation of unique compositions.

TAURUS lockers, extremely durable and easy to maintain, are custom-made at no extra charge. To learn more, please contact us. Choosing HPL lockers from ALSANIT guarantees satisfaction.

HPL lockers, initially used exclusively in swimming pools, are now in common use.

We are the largest manufacturer of HPL lockers in Poland. Thanks to our acquired experience, our furniture is perfected in every detail.

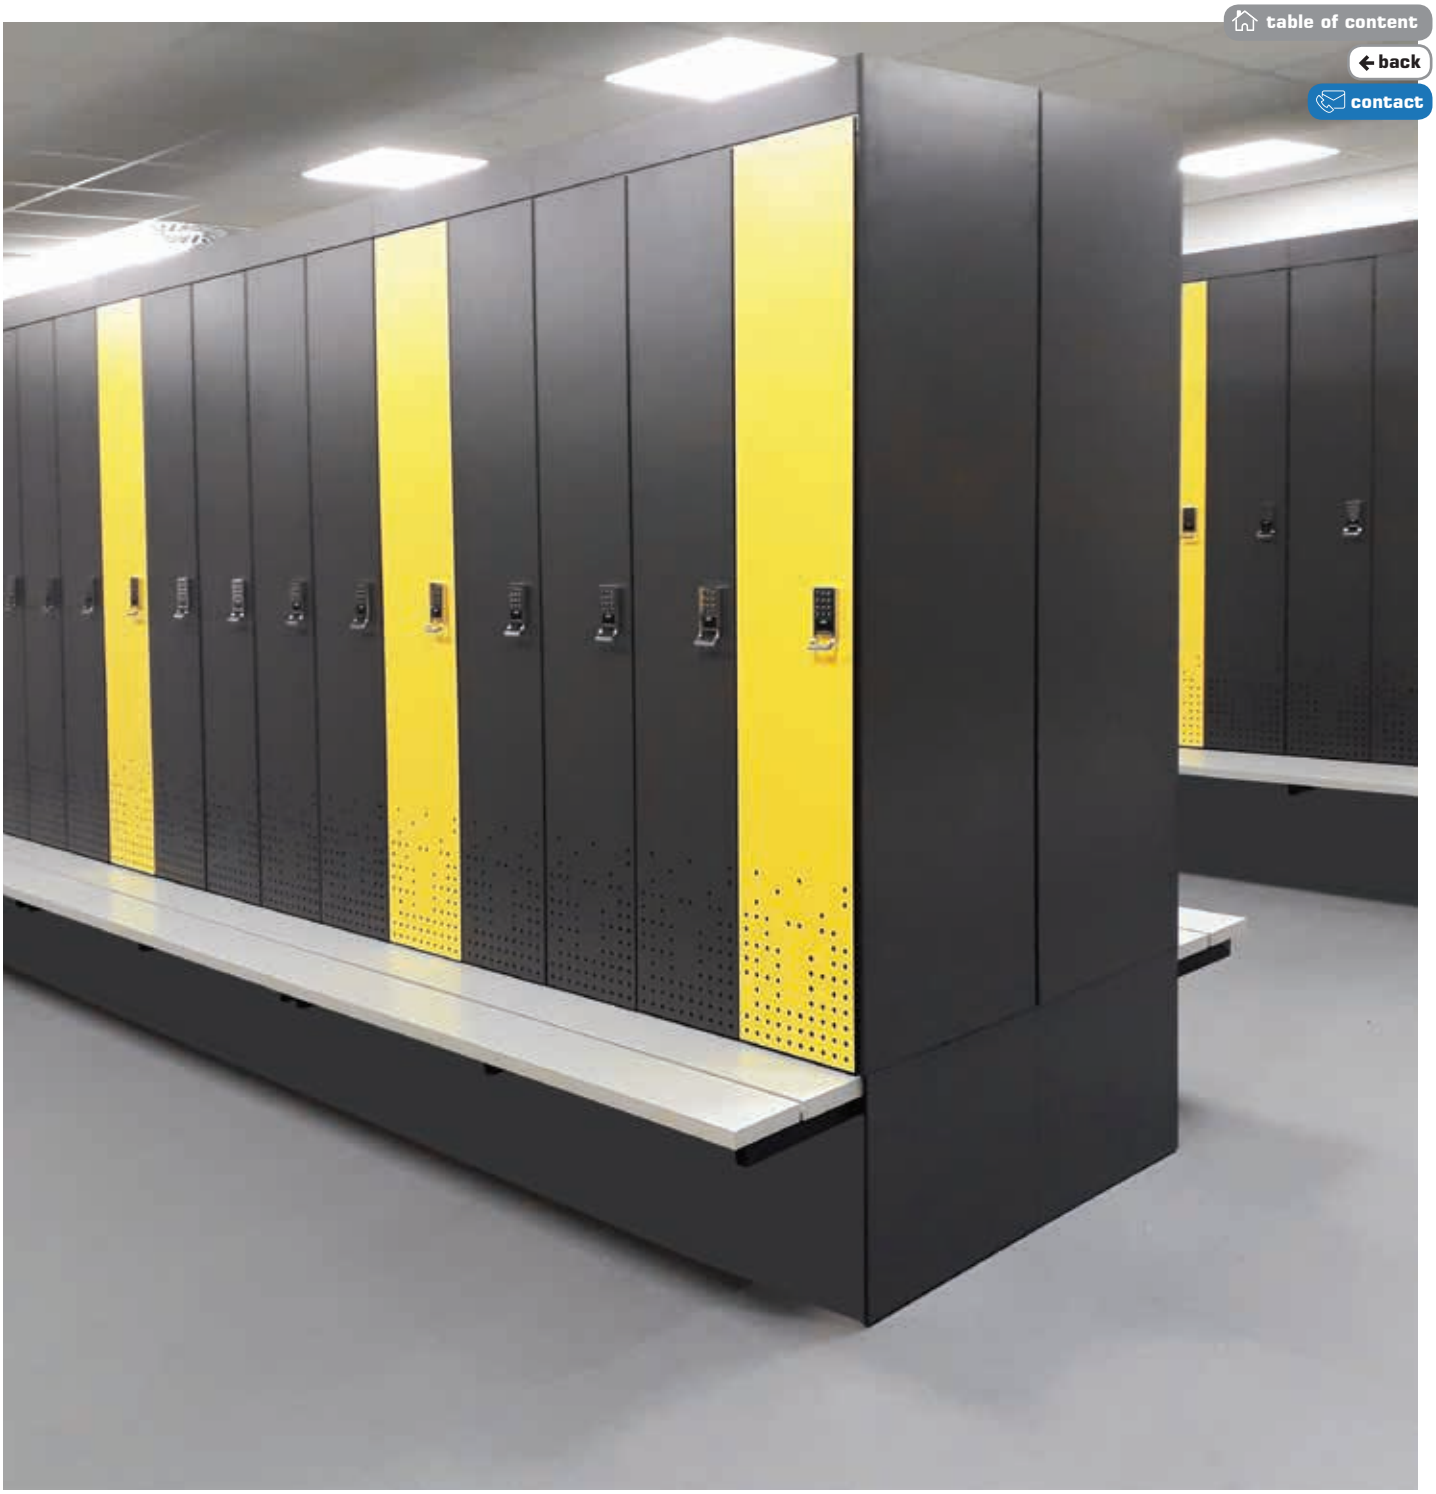

In-house accessories and fittings for lockers

Since we design and manufacture accessories and fittings for loc ers ourselves, we have confidence in their highest quality and durability.

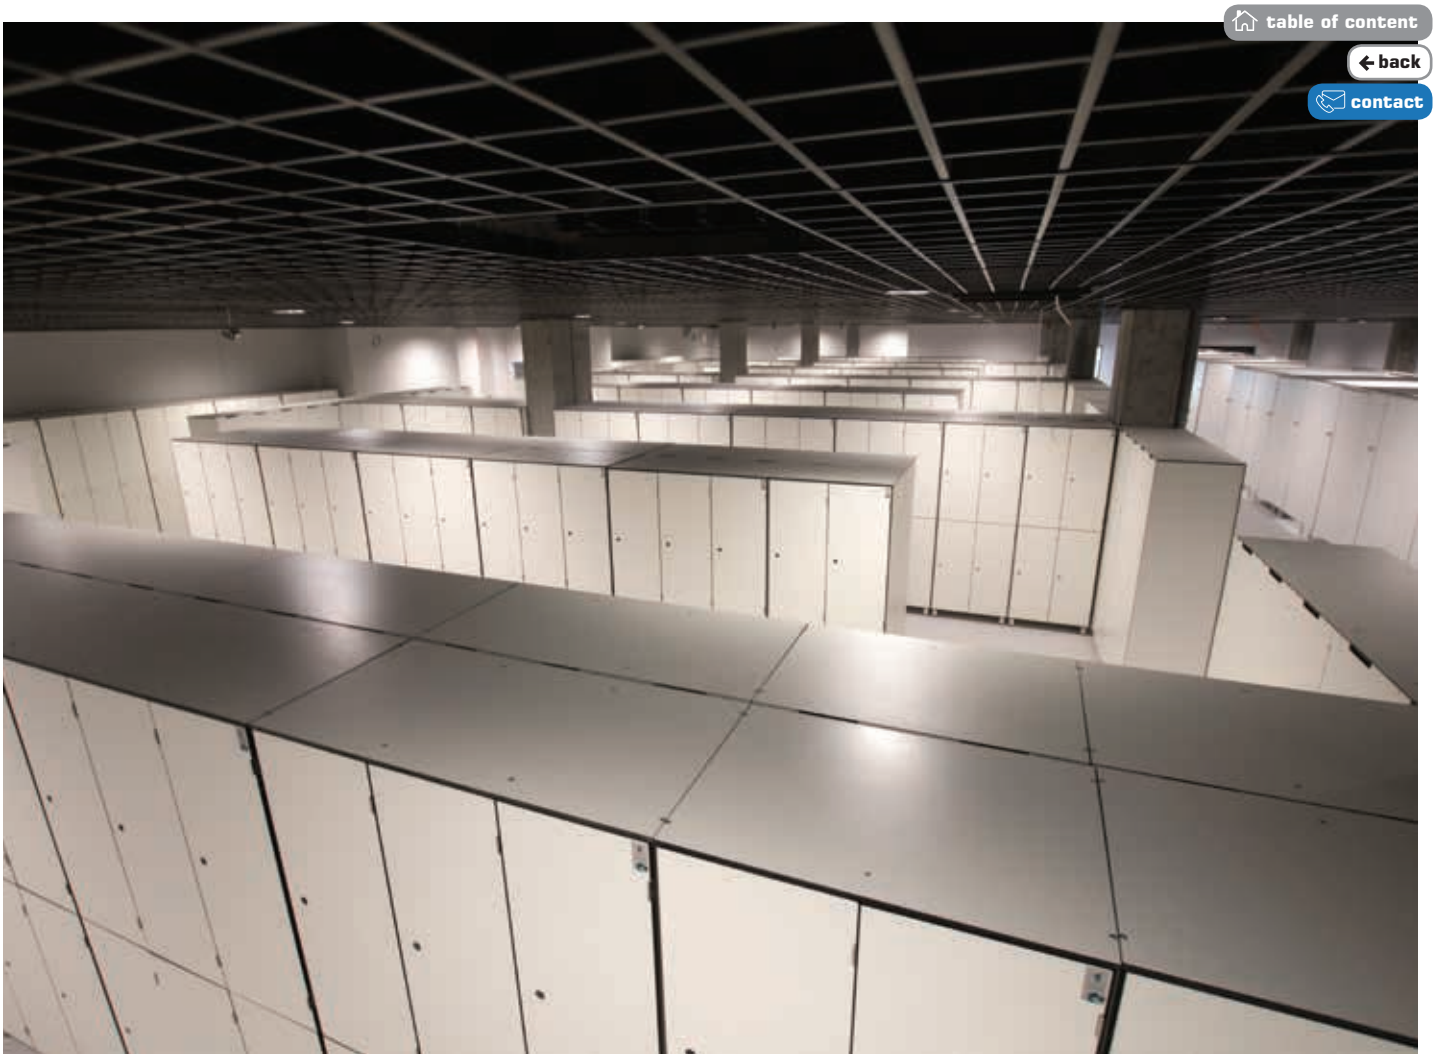

Antibacterial properties of HPL.

Due to the standard antibacterial and antifungal properties of HPL panels, they are perfect for industries such as pharmaceuticals or food processing.

Lockers made of HPL, which construction is made using patented system of aluminum profiles

ARTUS lockers ensure strength and durability for many years, while maintaining a modern look and functionality.

Protected design:
WP.30407 (hinge)

Description:

ARTUS series lockers are distinguished by specially designed structural profiles. They allow for the installation of additional options:
- AQUARI hinges that open at 180 degrees and allow for the construction of PIANO doors,
- LED lighting, which gives the lockers a modern and eye-catching character. The mounting socket for these elements if not used is discreetly hidden behind an elegant aluminum cover.

Thanks to innovative solutions, these lockers offer the possibility of configur - tion to any dimension, maximally meeting individual needs.

Although initially HPL lockers were intended for use in swimming pools, their excellent properties have led to their application in many other facilities.

Investing in ARTUS lockers is a choice of uncompromising quality. Designed for durability, functionality and elegant appearance, they prove that excellence is within reach of each of our customers.

HPL lockers - naturally waterproof.

The waterproofness and durability of HPL panels have become legendary. ALSANIT's HPL lockers are a combination of the material's best properties with years of experience in furniture production. It's a combination that guarantees satisfaction.

Innovative construction of aluminum profiles

The specially developed and patented profile system allows for achieving an excellent visual impression. The profiles provide the possibility of installing LED lighting, which distinguishes ALSANIT lockers from other products.

PIANO doors with „Finger-safe" function.

The profile system allows for the installation of another innovation, which serves both safety and aesthetic functions.

LUXA lockers represent elegance in a simple form and a nod towards Scandinavian style.

Thanks to a rich color palette, they allow for many possibilities in interior design.

Body:

MFC - Laminated chipboard

Doors:

MFC - Laminated chipboard

Prepared for **Smart Locker** page 96 →

PATENT OFFICE OF THE REPUBLIC OF POLAND

Protected design: WP.30407 (hinge)

Description:

Lockers made of chipboard are highly regarded and versatile in their application - from modern offices to fitness club

In the LUXA series, the available color palette of chipboard panels is impressive, and moreover, they are available in natural textures and patterns such as stone or wood. We do not limit ourselves only to doors; the bodies can also be made according to individual preferences, based on a wide range of panel decors.

An additional accent is provided by the edges bonded with ABS tape using the latest hot-air edge banding technology, giving the effect of an almost invisible joint. This innovative technology is a standard for us, although it appeared on the market only a few years ago.

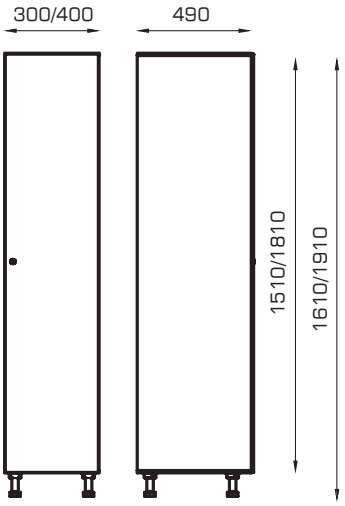

For facilities where furniture is not exposed to excessive moisture, LUXA lockers are an excellent choice because they offer the possibility of creating original and stylish compositions at an attractive price.

- only Torx screws are used
- fully assembled product
- the possibility of custom built
- smooth inner walls
- custom sizing available
- easy to clean

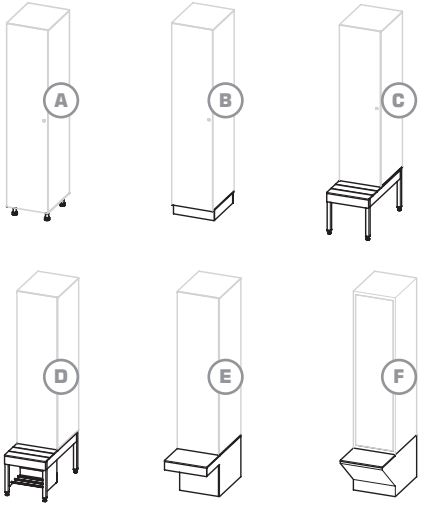

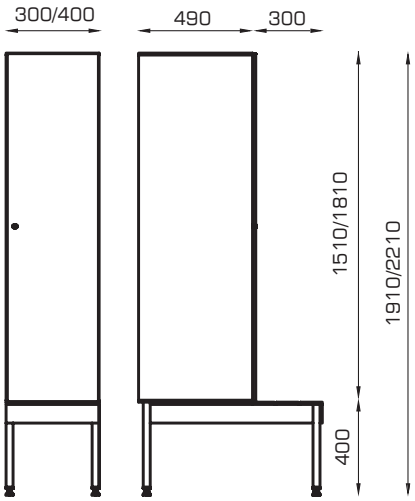

- **Quality confirmed by certificate**
- **Budget solutions**
- **Even gaps between the doors**
- **Frontlaying doors**
- **Decors also available in 3D structure**
- **Available in High Gloss**

Big impression at a small price.

By using cost-effective materials and a rich color palette, you can achieve a WOW effect without risking budget strain.

Design support - together we create space.

Thanks to cooperation with ALSANIT, it's easy to brighten up and add variety to interiors.

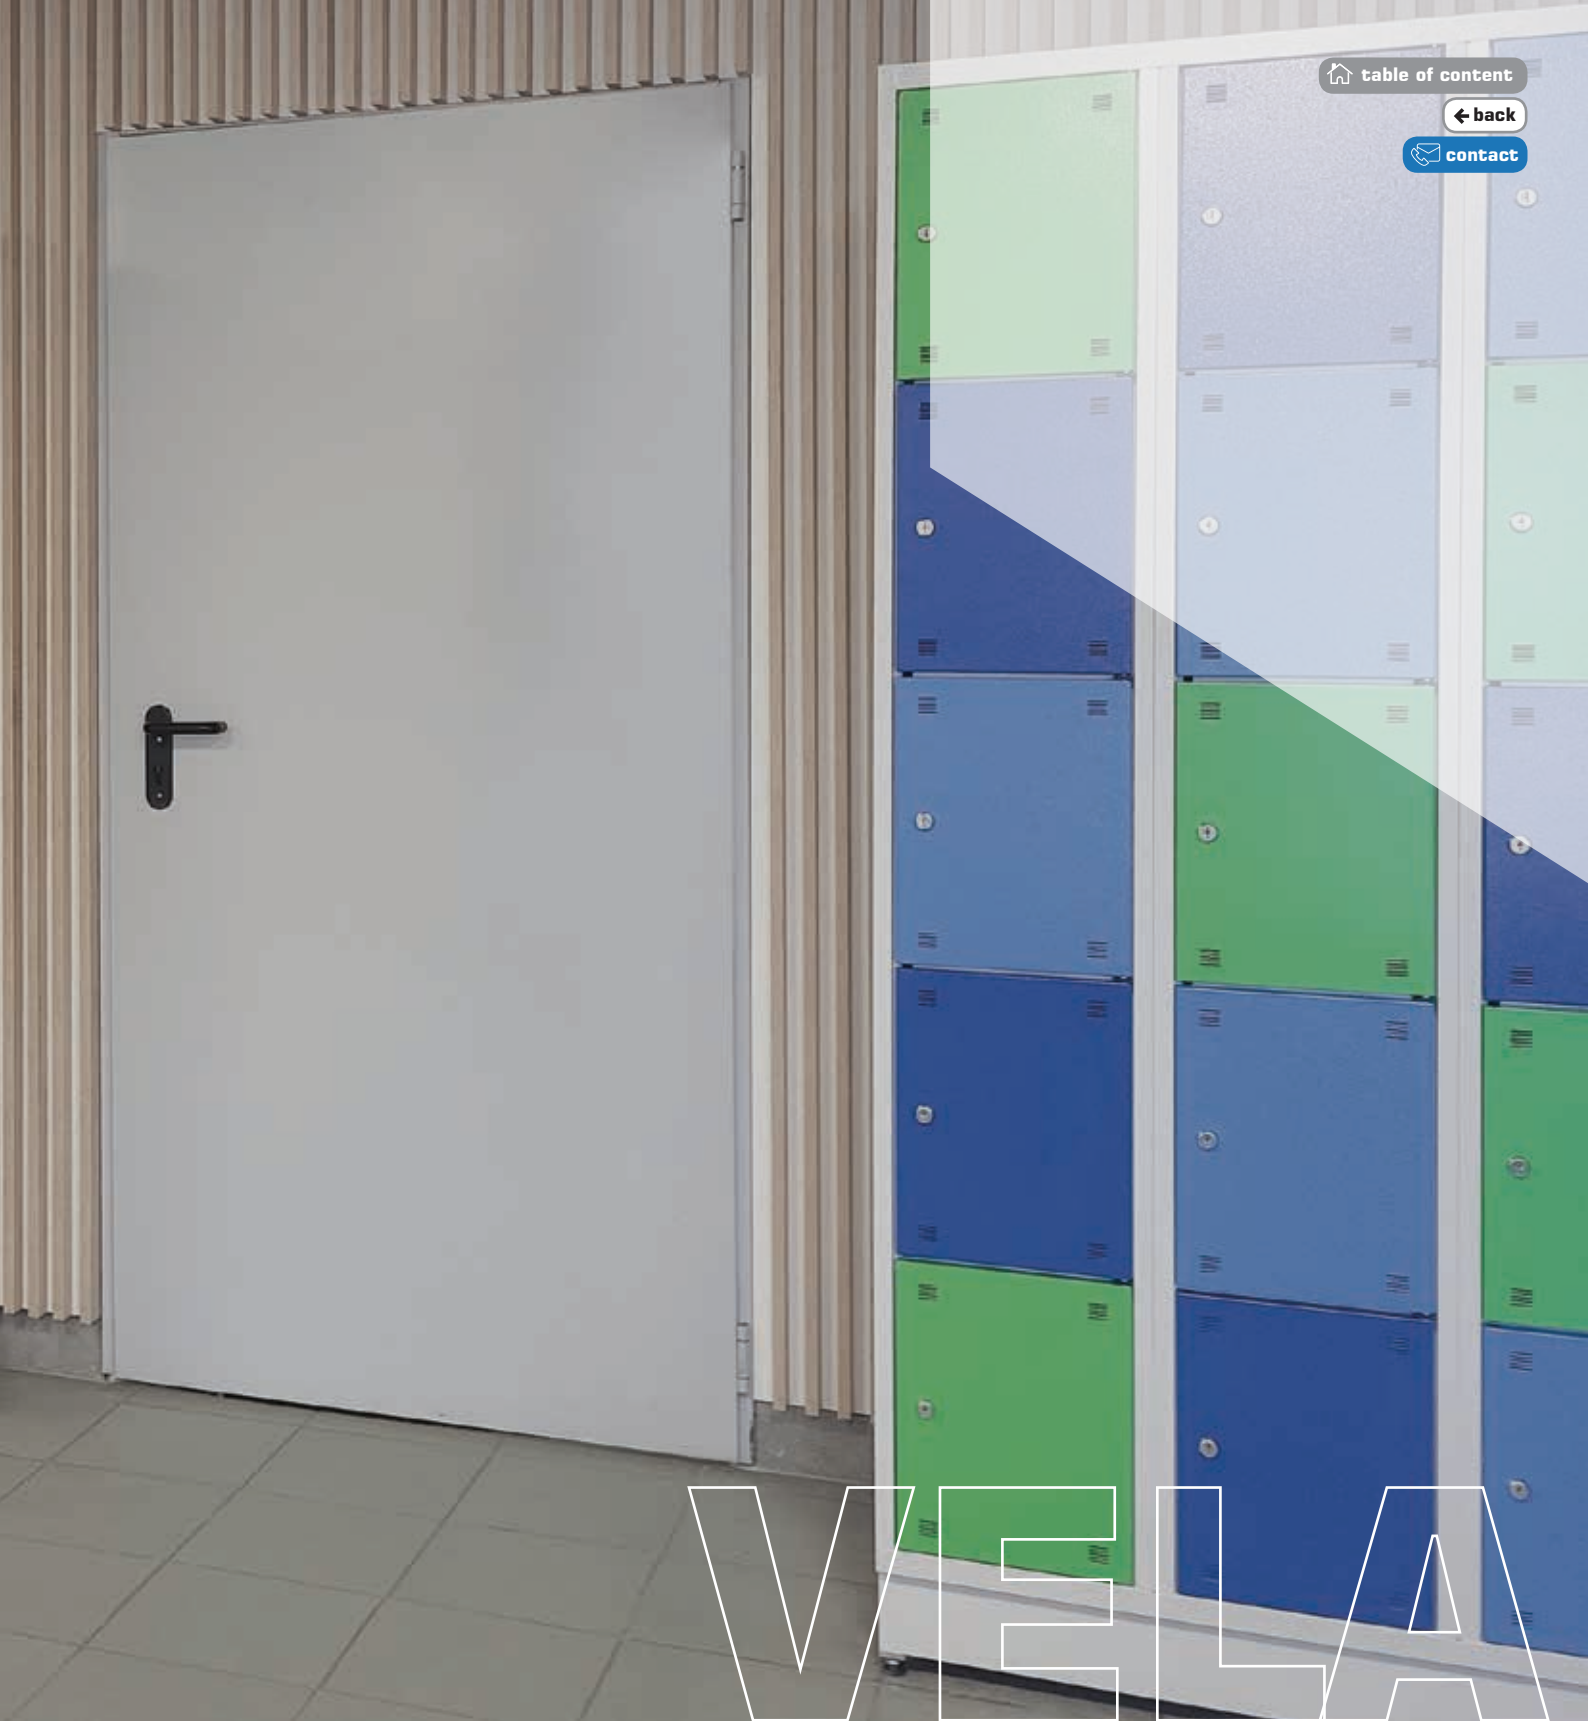

Metal furniture is one of our specialties - we design and manufacture it ourselves.

We pay attention to every detail to meet the users' requirements and provide the best solution for a budget-friendly metal locker.

VELA metal body, metal / hpl / mfc doors

Body:

METAL - Powder-coated galvanized steel

Doors:

METAL - Powder-coated galvanized steel
HPL - High pressure laminate
MFC - Laminated chipboard

Prepared for **Smart Locker**

page 96 →

Description:

In the competitive market of metal lockers, many companies promote their products primarily based on price. However, the lowest price does not necessarily align with quality.

VELA lockers are available at a competitive price, but our priority in their design was to ensure quality and durability better than that of other manufacturers. We aimed to guarantee long-lasting, trouble-free use, which in the long run is more cost-effective than purchasing the cheapest products that quickly deteriorate.
The bodies are always made of galvanized steel, with adjustable legs and durable accessories like those from our higher-end locker models. The ventilation system helps to avoid unpleasant odors and moisture buildup inside the locker, which is particularly important in schools and changing rooms where shoes and clothing are stored.

VELA lockers meet all legal requirements and are recommended with full confide - ce.

- fully assembled product
- employee lockers - standard vertical partition
- reinforced metal doors
- easy to clean

VELA many possibilities

Metal doors with perforation

Standard execution.

Smooth doors

Possible to be done at no extra charge.

Doors with a plexiglass window

Available for a surcharge.

Ideal for employee lockers. Additional partition as standard.

At no extra charge, we install the partition separating the area for clean clothes and dirty clothes. A must-have in employee lockers.

Excellent for schools. Doors reinforced with OMEGA profile

The additional reinforcement of metal doors ensures that even budget lockers are durable and resilient at schools.

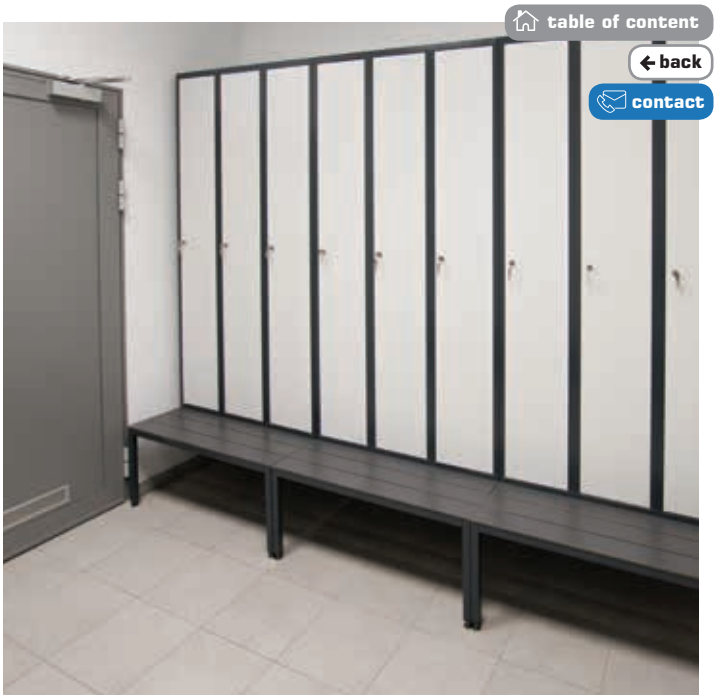

Why choose VELA lockers?

Vela offers a wide range of configuration options at an affordable price.
It is a system that utilizes metal bodies optimally tailored to the needs of users in places such as schools, workplaces, and offices. There is the possibility of using various door options - from choosing the material, METAL, HPL, or MFC, to their function, and matching the color.

Galvanized steel - an ALSANIT standard that makes a difference.

By using galvanized steel, we ensure that our products are an investment for many years to come. We constantly strive to deliver products that are better than those currently available on the market.

Prepared for SMART LOCKERS.

With years of experience in delivering intelligent locker systems, our products are prepared for SMART LOCKERS installation.

BENCHES

Benches are the perfect add on to any locker room.

Properly chosen, they can add character to the interior - make it more friendly and inviting.

Locks for lockers

Security - a common value of the locks we offer, that is why we only provide those from reputable manufacturers. Below, we describe three additional features that guided us in selecting the locks for our products.

Waterproofnes - prepared to work in any conditions.
Prioritizing quality above all, we have decided that all locks offered by us are suitable for use in moist areas.

Interchangeability - lock models can be exchanged at any time, changing from a lower model to a higher one. This way, the locker room can be modernized without the need for costly door replacement. When changing locks to deposit or electronic locks, additional holes will have to be made in doors.

Availability - don't waste time waiting.
A strong aspect of our offer is the availability of locks on stock, significantly reducing the time needed to complete the order. For projects with slot or digital locks above 200 compartments, please contact us to confirm availabilit .

Cam locks, the locks we offer have a 1/1000 combination, meaning the chance of opening with your key any another locker is 0.1%.

Padlock locks, an alternative to key locks is padlocks. The recommended shackle diameter for padlocks is 5-7 mm.

The option to use any lock.

We are not limited to our own selection; we can integrate the locker with any lock specified by the client.

Code locks are maintenance-free solutions. All code locks offered by us have a master key opening option in case the code is forgotten.

Deposit locks, Coin-operated or token--operated locks are capable of accepting coins or tokens into a special container. Locks can operate on coins of 1/2 EUR. In case of key loss, locks can be opened using a master key.

Electronic lock that support the standard RFID are modern programmable locks operated by CARDS, WRISTBANDS, or other RFID TOKENS. Available in both OFFLINE versions powered by batteries and ONLINE versions powered externally.

SMART LOCKERS

Smart Locker systems provide solutions for every type of business. Discover the details and see how you can benefit from them.

SMART LOCKERS

The benefits of using Smart Locker

What is a Smart Locker and why is it the product of the future?

A Smart Locker is more than just a storage or parcel delivery point. It consolidates various functions into one system, addressing the logistical challenges faced by modern businesses, institutions, and schools. It provides solutions for personal item storage, product sales or rentals, parcel delivery and pickup, as well as controlled distribution of company or institutional items. These are just a few examples of the many applications of Smart Lockers.

SMART LOCKER transforms lockers into solutions

ALSANIT introduces innovative solutions in the field of lockers with smart locks, enabling electronic control over them.

Thanks to cooperation with the renowned brand SMART LOCKER, representing the most advanced intelligent locking system available on the market, we can confidently offer this solution to our customers.

SMART LOCKER stands out not only for its ease of use but also for its rich configuration options, ensuring easy management and convenient use.

- **The possibility of integration for any ALSANIT locker system**
- **Full service including installation and training**
- **The ability to integrate with the client's database**
- **The ability to customize the software to individual needs**

SMART LOCKER is an intelligent locker system that introduces a new era of facility management.

Smart Lockers

Modern companies and institutions are choosing SMART LOCKER

- Receive all your parcels from any carrier in one place.
- Effortlessly dispense workwear or distribute mail.
- Exchange documents or keys using easily managed lockers.
- Reduce costs by fl xibly assigning users to lockers in the changing room.
- Control the circulation of tools or electronic equipment.
- Earn money by selling oversized items in hospitals, sports facilities, etc.

Flexible configuration of Smart Locker

Available identification method

Users can open lockers using the mobile application, website, QR code, RFID card, PIN code, or access screen.

One locker, many functions

Lockers have versatile applications and can serve multiple functions simultaneously. They can be used interchangeably by employees, guests, package delivery personnel, and facility managers. Each compartment can be individually configured for a different scenario.

Smart Lockers

Earn with Smart Lockers:

- Limited personnel costs.
- Reduced costs of used tools thanks to identification of ta e outs.
- Renting lockers can be charged, from first hour or after xceeding a certain time.
- Possibility of locker reservation ONLINE (concerts, theaters, etc.).
- Possibility of selling items.
- 24/7 access.

TOILET CUBICLES

We are the biggest Polish cubicle producer our products are most durable and set the market standards.

The **SOLARI** system is the perfect combination of durability and aesthetics at the best price.

Due to its versatility, it is the most popularly purchased sanitary cabin system in Poland

SOLARI

SOLARI cubicles made of hpl / mfc / sp

Available in:

MFC - Laminated chipboard
HPL - High Pressure Laminate
SP - Sandwich panels

PATENT OFFICE OF THE REPUBLIC OF POLAND

Protected design
64932 (knob-lock)

Description:

The SOLARI cubicle system is a solution designed with users in mind, emphasizing both functionality and economy. For this purpose, ALSANIT designers have developed fittings using durable and aesthetic materials such as polyamide and aluminum.

The SOLARI system has become extremely popular and quickly gained the position of a bestseller among sanitary cubicle systems. It holds necessary approvals and certifications for industry.

Our systems have a CE certificate recognized throughout the EU.

The SOLARI system has been prepared for easy and quick self-assembly. All necessary instructions are included in the set.

- only Torx screws are used
- doors opening outward or inward
- hinges with gravity self-closing
- very high durability
- tailor made to individual dimensions

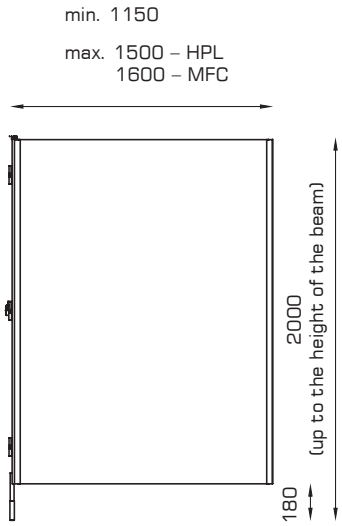

Best selling system in Poland

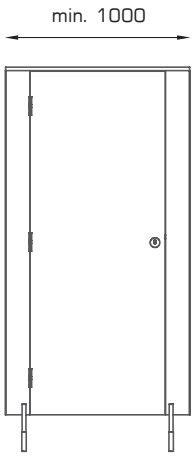

CE certificate valid throughout the European Union

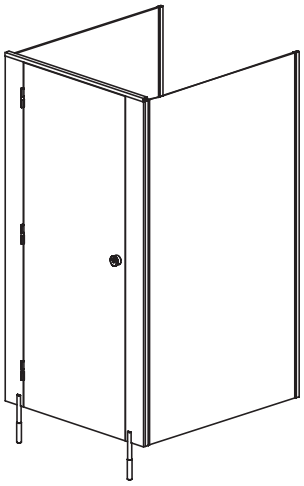

Fittings developed by ALSANIT are manufactured in Poland at the company headquarters

SOLARI construction details

Construction details:

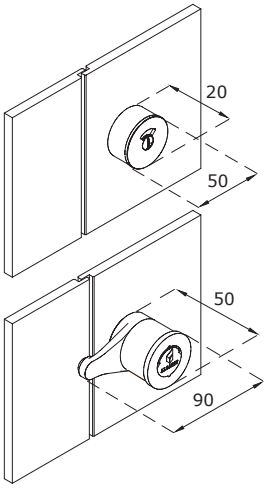

Hinges

- tested durability: 200,000 open/close cycles
- typically for ALSANIT, mounting to narrow edges of boards
- aluminum body with polyamide insert
- gravity self-closing
- first lubrication needed after several years of use
- optionally - hinges for internal doors not visible from the outside

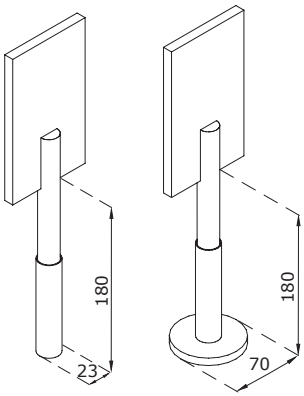

Knob-locks

- classic ALSANIT knob-locks made of aluminum and polyamide
- no maintenance required
- emergency opening possibility
- universal for left/right doors
- bolt rotation angle of 180°
- white-red occupancy indicator

Support-legs

- aluminum with a stainless steel core
- for 10-18 mm panels mounted to the side of the panel, for 28 mm and thicker panels screwed into the core of the panel
- quick installation, only one hole in the floor for the brac et
- adjustment range +/- 20 mm
- optionally, a rosette mounted on two dowels, covered with a plate

Types of panels available for the system:

MFC
Laminated chipboard

18 mm
28 mm

MFC is compressed under high temperature and pressure using binding agents with wood chips. The top layer is a decorative melamine coating.

- edges are finished with durable edging using HOT-AIR technology (glueless)
- suitable for rooms with normal humidity

Fire classification: Ds1d

A solution for door frame for MFC boards

Support leg mounted frontally for 18 mm boards

Support leg screwed into the core for 28 mm boards

Top-mounted beam

Wall and partition mounting

HPL
High pressure laminate

10 mm
12 mm

HPL (High Pressure Laminate) - cellulose fibers saturated with resin and compressed under high pressure. The material is 100% waterproof and its properties are consistent throughout the entire board cross-section.

- milled edges-black core of the board is visible
- for rooms with high humidity

Fire classification: Cs2d0 - 10 mm, Bs1d0 - 12 mm (option)

A solution for door frame for HPL boards

Support leg mounted frontally

Top-mounted beam

Wall and partition mounting

SP
Sandwich panels

36 mm

Panels with a total thickness of 36 mm - feature an aluminum frame filled with foamed polystyrene, 28 mm thick, with outer layers consisting of 4 mm HPL.

- excellent rigidity and aesthetics
- ideal for full-height installations
- provide the best soundproofin

Fire classification: Es1d

A solution for door frame for SP boards

Support leg screwed into the core

Rear-mounted beam

Possibility of using a handle

Concealed mounting for walls and partitions

Beauty, prestige, precision - these are the key features of the PERSEI system.

We have achieved them through the highest quality fittings specially designed by ALSANIT's engineers.

PERSEI

PERSEI cubicles made of hpl / mfc / sp

Available in:

MFC - Laminated chipboard
HPL - High Pressure Laminate
SP - Sandwich panels

Description:

Brushed steel has become a popular element in modern architecture. The PERSEI system, specially designed by ALSANIT's engineers, features ergonomic and elegant fittings with a brushed steel finis

This versatile system is compatible with various types of panels. Aluminum profiles with a delicate design securely hold the structure together, providing rigidity while maintaining a sense of exceptional lightness. The PERSEI system is an excellent choice for projects where elegance and functionality go hand in hand. The reinforcing headrail is typically concealed behind the cabin doors, adding elegance and aesthetics to the fronts.

The system can be installed independently according to the provided instructions or with the assistance of an authorized ALSANIT installation team, ensuring convenience and confidence in proper assembly.

- only Torx screws are used
- doors opening outward or inward
- hinges with gravity self-closing

AQUARI is a combination of an innovative SAFE FINGERS solution and exceptional design.

A universal system showcasing classic elegance derived from simple lines created by aluminum profiles

AQUARI

AQUARI cubicles made of hpl / mfc

Available in:

MFC - Laminated chipboard
HPL - High Pressure Laminate

PATENT OFFICE OF THE REPUBLIC OF POLAND

Patent
P. 425699
(hidden hinge)

Description:

The AQUARI system is proof that innovation in the field of sanitary cabins is possible. AQUARI represents an approach to our previously developed products - continuous improvement aimed at delivering leading solutions.

The most intriguing element of the AQUARI system is the hinge hidden in the door frame profile. This solution ensures an aesthetic appearance and protects against potential collisions - finger trapping between the door leaf and the frame. The cabin support is mounted in line with the frame profiles, creating a cohesive and harmonious whole. The AQUARI system is a combination of the highest quality materials, innovative solutions, and original design. These solutions have been patent protected.

- only Torx screws are used
- doors opening outward or inward
- hinges with gravity self-closing
- very high durability
- tailor made to individual dimensions

Fire classification: Cs2d0 - 10 mm,
Bs1d0 - 12 mm (option)

A solution for door frame

Integrated support leg with the profil

Top-mounted beam (in saloon cubicles - no beam)

„Safe fingers" solution

We have developed a unique solution which involves placing the hinge mechanism inside closed profiles to provide additional protection for hands from injury. The features of the system are summarized below:

- hinges are hidden within the door frame profiles, preventing fingers from being trapped between the door leaf and the frame,

- the hinge self-closing does not have a spring that could hit a child when the door is pulled,

- doors close due to gravity force - an extremely safe and reliable solution,

- this solution has been filed for patent protection and is produced exclusively by ALSANIT in Poland.

PATENT OFFICE OF THE REPUBLIC OF POLAND

Patent P. 425699

We offer the LIFT system to clients who do not use standard solutions.

So that each room has its own unique, difficult-t -replicate style.

LIFT

LIFT cubicles made of mfc / hpl / sp

Available in:

MFC - Laminated chipboard
HPL - High Pressure Laminate
SP - Sandwich panels

Description:

The LIFT cabins are a unique architectural solution for sanitary spaces where design plays a crucial role. LIFT is a line of cabins characterized by a recessed leg and an invisible reinforcing profile. From the front, this creates the impression that the cabins are suspended in the air, inspiring the name of this unique system.

LIFT cabins offer not only aesthetics but also solidity and durability, guaranteeing long-term use and maintaining an elegant appearance for many years.

The visual consistency of the project concept and the emphasis on cleanliness and hygiene are key elements that translate into positive user experiences.

The effect of floating cabins perfectly complements the prestige and elegance of facilities such as office buildings, hotels, or shopping centers. It is an excellent solution wherever interiors require exceptional style and a unique character.

- only Torx screws are used
- doors opening outward or inward
- hinges with gravity self-closing

- emergency opening capability
- universal for left/right doors
- bolt rotation angle of 360°
- „click" every 90°
- easy to use, including for individuals with disabilities
- white-red occupancy indicator

Support-legs

- "hanging" cubicle effect
- made of brushed steel
- ensure easy leveling of partitions
- for 10-18 mm boards mounted to the side of the board, for 28 mm and thicker boards screwed into the core
- adjustment range +/- 20 mm
- rosette mounted on two dowels, covered with a plate

Types of panels available for the system:

MFC
Laminated chipboard

18 mm
28 mm

MFC is compressed under high temperature and pressure using binding agents with wood chips. The top layer is a decorative melamine coating.

- edges are finished with durable edging using HOT-AIR technology (glueless)
- suitable for rooms with normal humidity

Fire classification: Ds1d

A solution for door frame for MFC boards

Support leg mounted on a partition wall

Rear-mounted beam

Wall and partition mounting

HPL
High pressure laminate

10 mm
12 mm

HPL (High Pressure Laminate) - cellulose fibers saturated with resin and compressed under high pressure. The material is 100% waterproof and its properties are consistent throughout the entire board cross-section.

- milled edges-black core of the board is visible
- for rooms with high humidity

Fire classification: Cs2d0 - 10 mm, Bs1d0 - 12 mm (option)

A solution for door frame for HPL boards

Support leg mounted on a partition wall

Rear-mounted beam

Wall and partition mounting

SP
Sandwich panels

36 mm

Panels with a total thickness of 36 mm - feature an aluminum frame filled with foamed polystyrene, 28 mm thick, with outer layers consisting of 4 mm HPL.

- excellent rigidity and aesthetics
- ideal for full-height installations
- provide the best soundproofin

Fire classification: Es1d

A solution for door frame for SP boards

Support leg screwed into the core

Rear-mounted beam

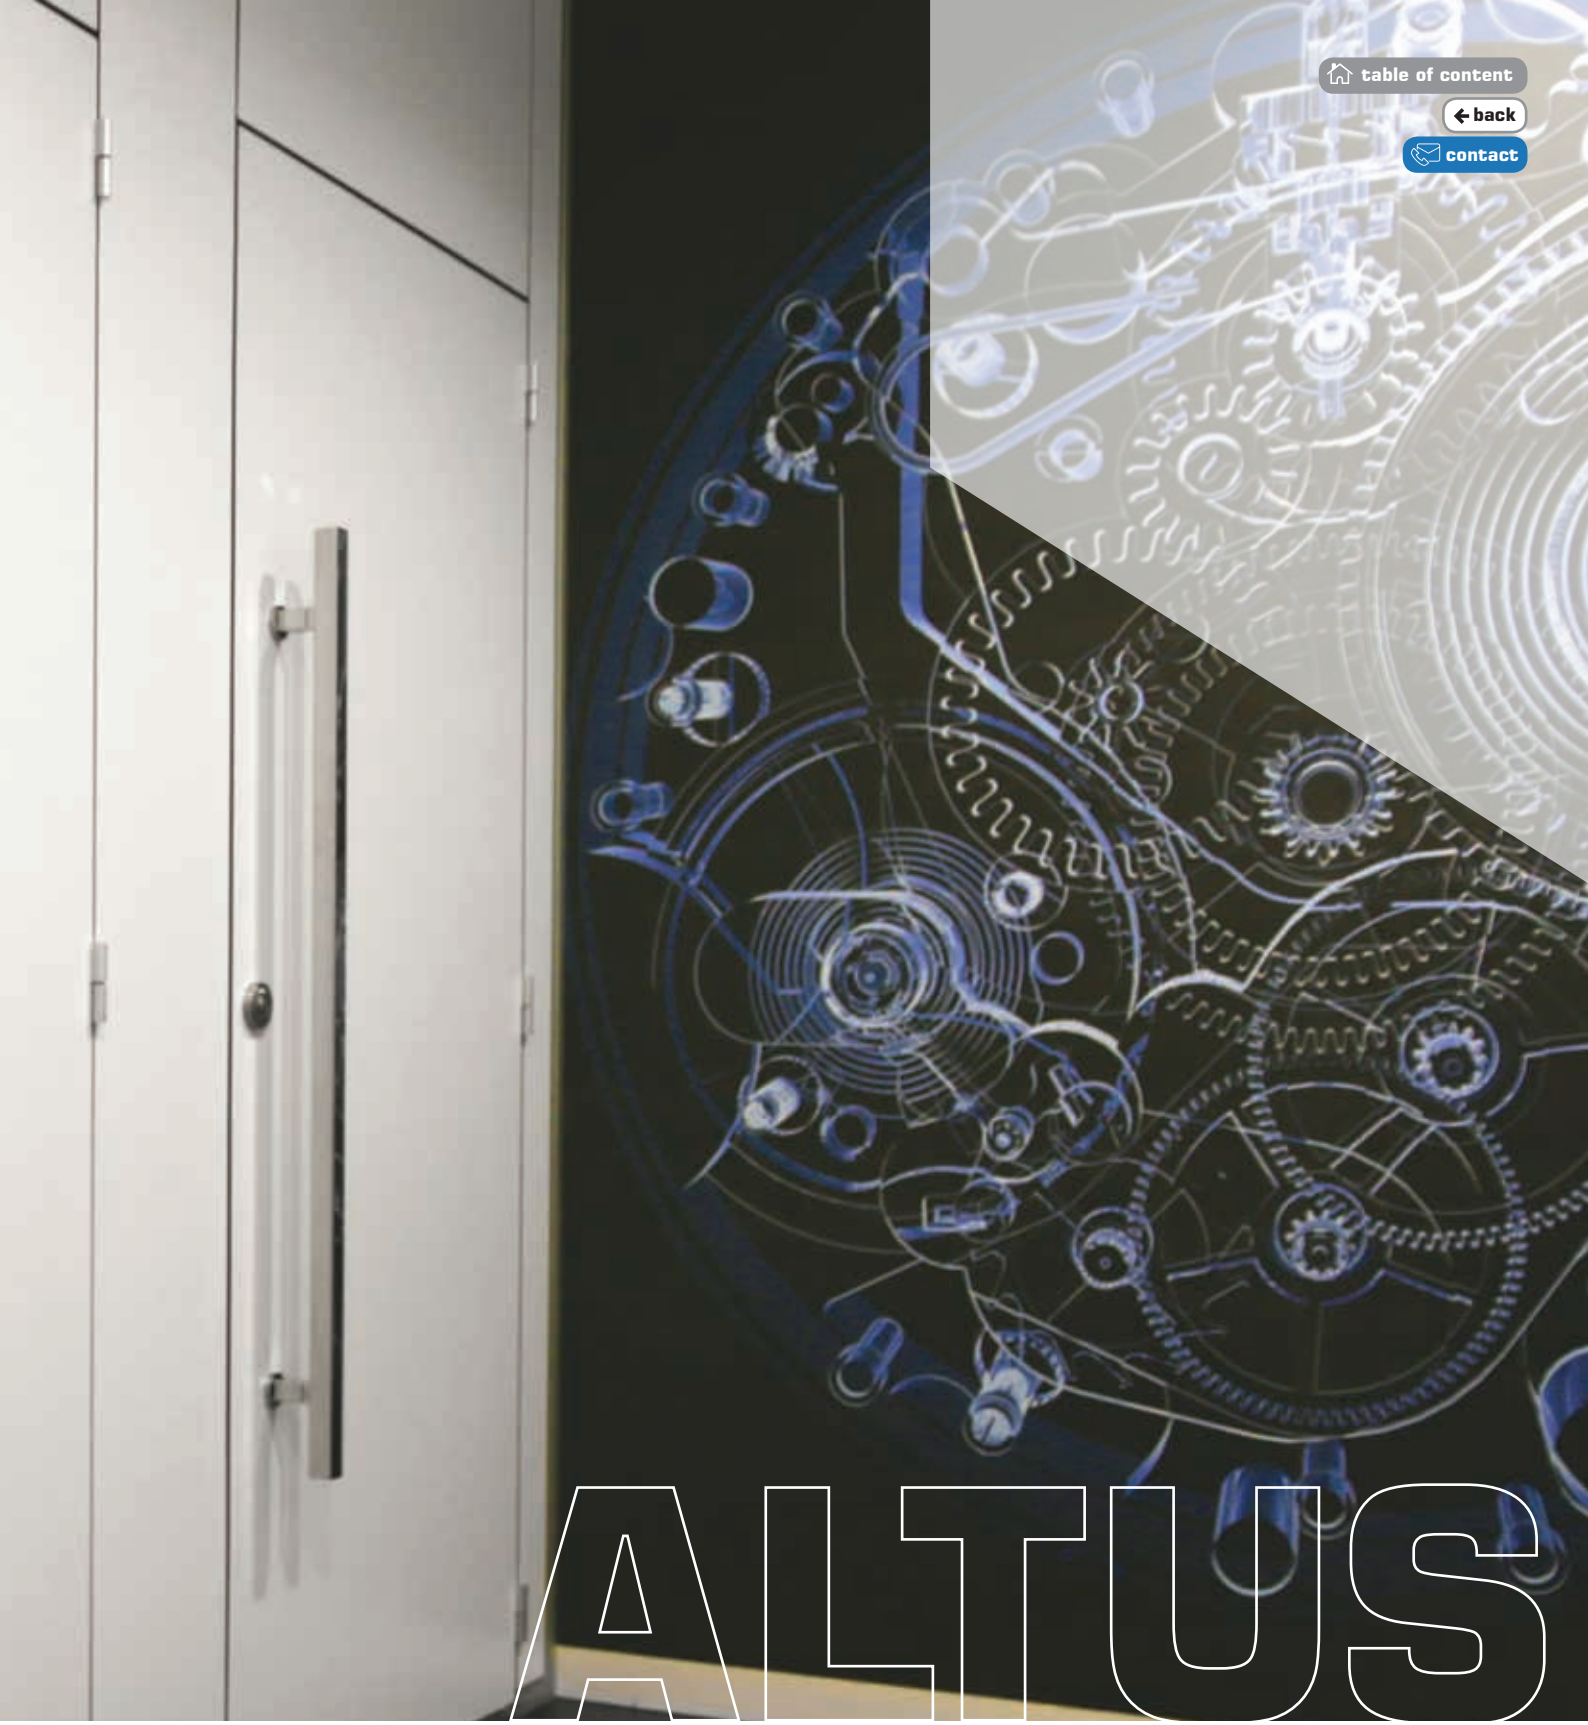

Possibility of using a handle

Concealed mounting for walls and partitions

ALTUS, full-height sanitary partitions that improve user comfort and the aesthetics of the room.

Optimally utilize available space, organizing it and improving its usability.

ALTUS

ALTUS full-height cubicles

Available in:

MFC - Laminated chipboard
HPL - High Pressure Laminate
SP - Sandwich panels

Description:

Full-height toilet cabins are becoming increasingly popular because they not only guarantee privacy but also allow for better coherence between sanitary interiors and the overall appearance of the building. This makes this type of WC cubicles increasingly applicable in newly constructed facilities.

The design of full-height cabins is executed considering the space and character of the rooms. However, proper preparation and finishing of the rooms before installation are important, as this system is entirely prepared at the ALSANIT factory and maintains small dimensional tolerances. Any deviations from the specified dimensions may hinder installation.

Due to its proven construction and high-quality materials, the ALTUS system performs excellently in restrooms with high traffic volume

- only Torx screws are used
- doors opening outward or inward
- hinges with gravity self-closing
- very high durability
- tailor made to individual dimensions

Full-height cabins

CE certificate valid throughout the European Union

Fittings with a brushed steel finis

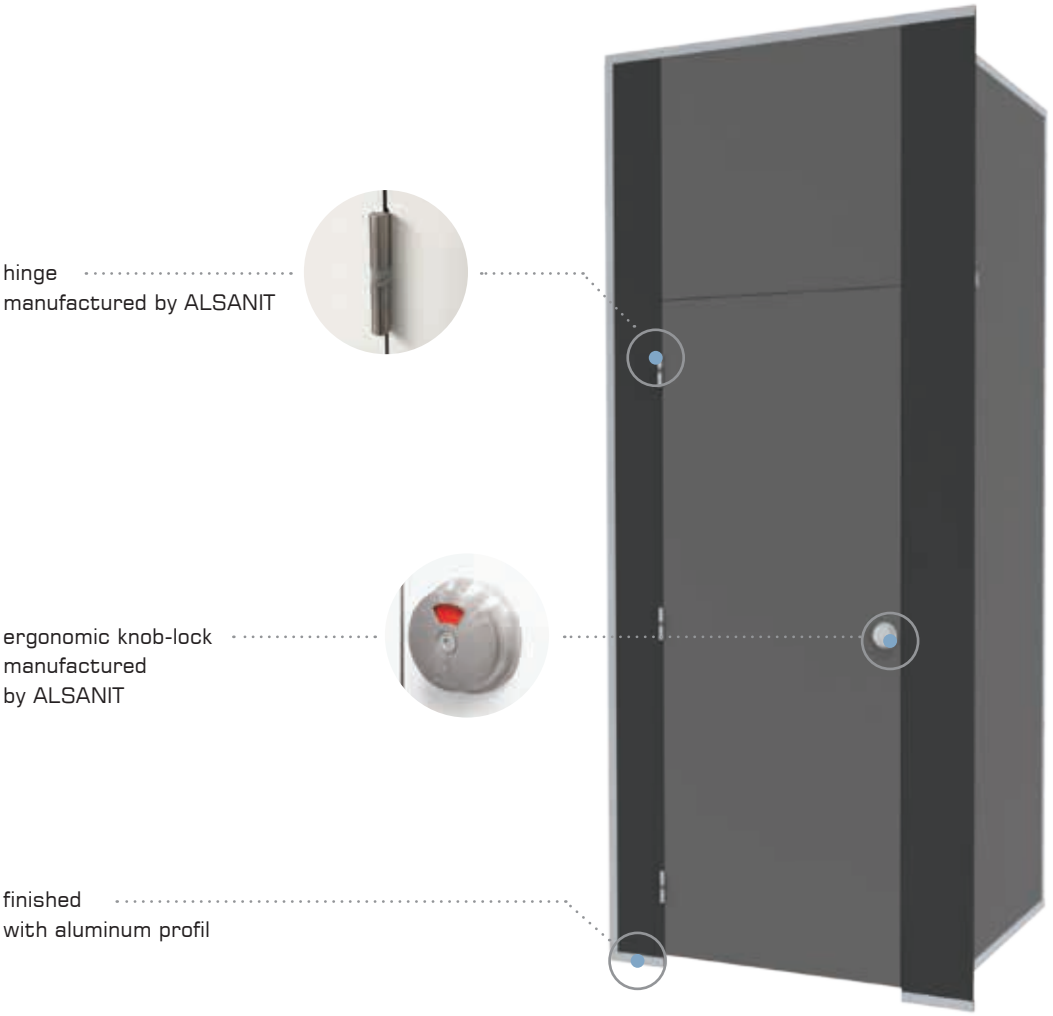

Fittings developed by ALSANIT are manufactured in Poland at the company headquarters

Production on CNC machines ensures precision and short lead times

ALTUS construction details

Construction details:

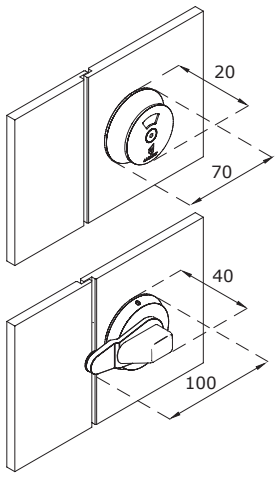

Hinges

- tested durability: 200,000 open/close cycles
- typically for ALSANIT, mounted to narrow edges of panels
- made of brushed steel with a polyamide insert
- gravity self-closing
- minimalist appearance
- optionally - hinges for internal doors not visible from the outside

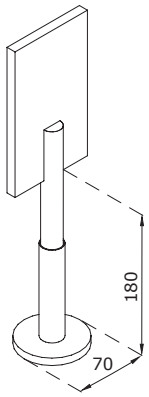

Knob-locks

- elegant, ergonomic and highly durable
- emergency opening capability
- universal for left/right doors
- bolt rotation angle of 360°
- „click" every 90°
- easy to use, including for individuals with disabilities
- white-red occupancy indicator

Support-legs (Optionally)

- made of brushed steel
- ensure easy leveling of partitions
- for 10-18 mm boards mounted to the side of the board, for 28 mm and thicker boards screwed into the core
- adjustment range +/- 20 mm
- rosette mounted on two dowels, covered with a plate

Types of panels available for the system:

MFC
Laminated chipboard

18 mm
28 mm

MFC is compressed under high temperature and pressure using binding agents with wood chips. The top layer is a decorative melamine coating.

- edges are finished with durable edging using HOT-AIR technology (glueless)
- suitable for rooms with normal humidity

Fire classification: Ds1d

A solution for door frame for MFC boards

Rear-mounted beam

Wall and partition mounting

Optionally Support leg mounted frontally for 18 mm boards

Optionally Support leg screwed into the core for 28 mm boards

HPL
High pressure laminate

10 mm
12 mm

HPL (High Pressure Laminate) - cellulose fibers saturated with resin and compressed under high pressure. The material is 100% waterproof and its properties are consistent throughout the entire board cross-section.

- milled edges-black core of the board is visible
- for rooms with high humidity

Optionally Support leg screwed into the core

VITRAL perfectly fits into the trends of 21st-century architecture, where glass plays a key role.

Fittings refined in eve y detail complement the prestigious appearance.

VITRAL

VITRAL cubicles made of glass

Available in:

GLASS - Tempered glass

Optionally - partitions made of HPL

Description:

VITRAL cabins are perfectly suited for exclusive interiors, providing an exceptional visual effect. They are made of double-layered, tempered glass, which is further laminated, allowing for color customization. The tempering process ensures aesthetics and safety, as the doors become hard and resistant to damage.

We understand that the devil is in the details, so all metal elements of cabins are precisely manufactured on our CNC machines. As a result, VITRAL cabins are characterized not only by high aesthetics but also by excellent quality of workmanship.

It is worth noting that preparing the rooms for the installation of these cabins is crucial to achieve the best results. We recommend early contact and utilizing the support of the ALSANIT team during the planning and implementation stages. Glass enclosures require special attention to ensure an impressive end result.

- only Torx screws are used
- doors opening outward or inward
- hinges with gravity self-closing
- very high durability

VITRAL construction details

Construction details:

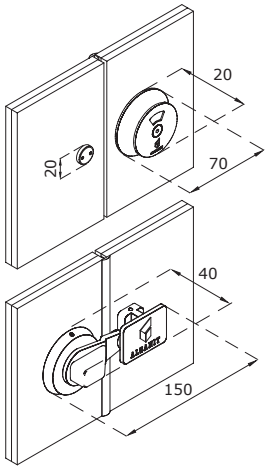

Hinges

- front / rear mounted
- gravity self-closing
- durability: 200,000 open/closed cycles
- minimalist appearance

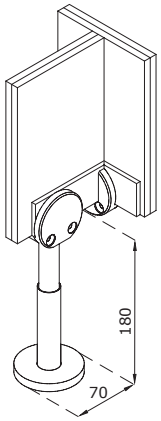

Knob-locks

- elegant, ergonomic and highly durable
- emergency opening capability
- universal for left/right doors
- bolt rotation angle of 360°
- „click" every 90°
- easy to use, including for individuals with disabilities
- white-red occupancy indicator

Support-legs

- effect of „hanging" cabins
- recessed 15 cm into the cabin
- ensure easy leveling of partitions
- adjustment range +/- 20 mm to the floo
- rosette mounted on two dowels, covered with a plate

Panels available for the system:

GLASS
Tempered glass

10 mm
12 mm

Tempered glass available in a wide range of RAL colors. To ensure the highest quality of cabins, we use laminated glass. Each panel is constructed with two sheets.

- milled edges
- suitable for rooms with normal and high humidity
- possibility of custom graphics

VITRAL - a unique system for exceptional interiors

ALSANIT has the necessary expertise and machinery to offer such sophisticated solutions as the VITRAL system.

All metal fttings of the cabins are manufactured on our CNC machines. This ensures that VITRAL cabins have a unique character and are meticulously crafted in every aspect.

A solution for door frame

Support leg mounted on the partition wall

Rear-mounted beam

Wall and partition mounting with L brackets

URINAL PARTITIONS

By using an aluminum rosette, we achieved an effect of exceptional lightness.

ALSANIT urinal partitions are installed using rosettes, eliminating the need for support legs.

available colors

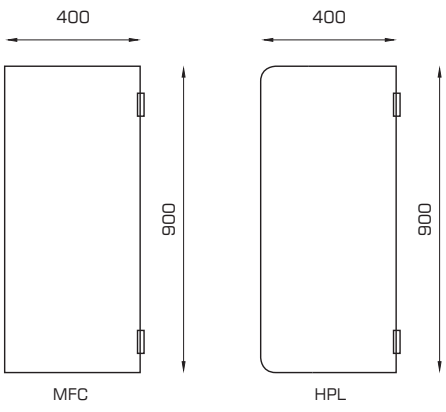

page 173 →

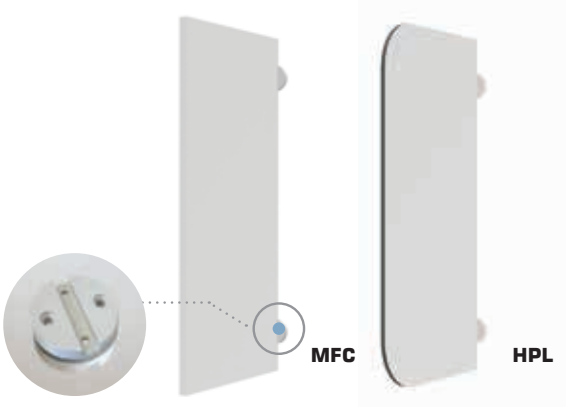

Urinal partitions

- Powder-coated rosette in a color close to RAL 7035
- Easy installation
- Minimalist appearance

MFC	HPL
18 mm	10 mm
28 mm	12 mm

HPL BUILT-INS

HPL panels are waterproof and exceptionally durable, making them increasingly popular in architecture and furniture. We have been working with them for over 20 years.

SHOWERS

Shower cubicles produced by ALSANIT are aesthetic, practical, and durable.

Thanks to the use of durable, and fully waterproof materials, ALSANIT shower cubicles are an investment for many years. Showers are typically made basing on the SOLARI system fittings

Showers „T" i „F"

- additional space for storing clothes
- curtain included

HPL

10 mm
12 mm

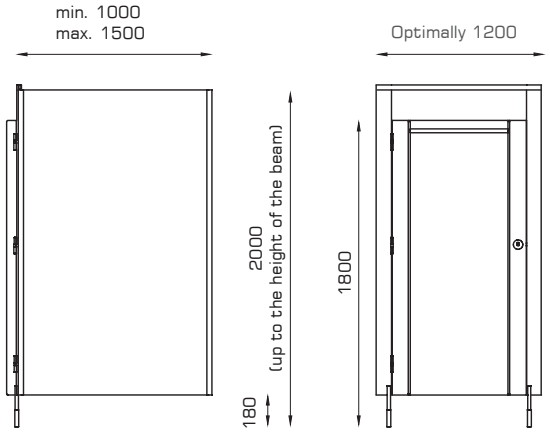

Showers with doors

- doors reinforced with ribs approximately 80 mm wide
- round profile for clothes or towel between the rib

HPL

10 mm
12 mm

VANITY TOPS

Sink countertops are an important element of restroom furnishings.

Due to the direct exposure to water, they need to be made of durable materials and properly installed.

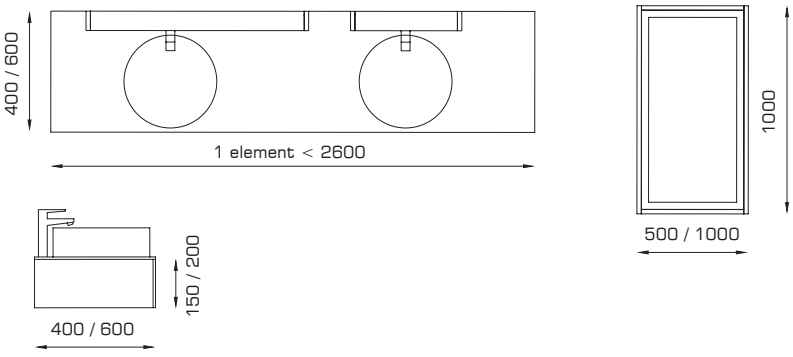

available colors

page 173 →

Vanity tops

- preparation for sink installation
- all visible edges routed
- need for panel joining for countertops longer than 2600 mm
- optionally additional mirror frames matching countertops

HPL

10 mm
12 mm

TECHNOWALL

Fast mounted and aesthetically pleasing wall claddings designed for large surfaces.

TECHNOWALL is a fully proprietary system of wall claddings with quick access to installations located behind them.

available colors

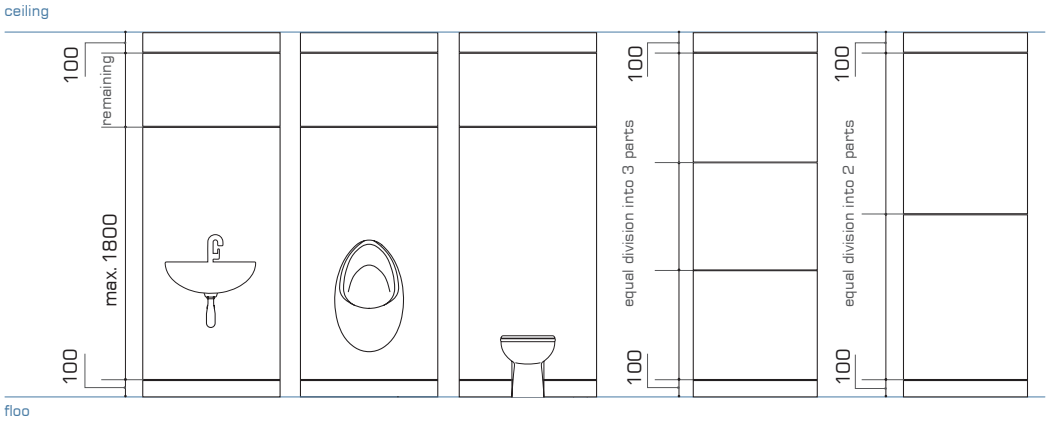

page 173 →

TECHNOWALL wall claddings

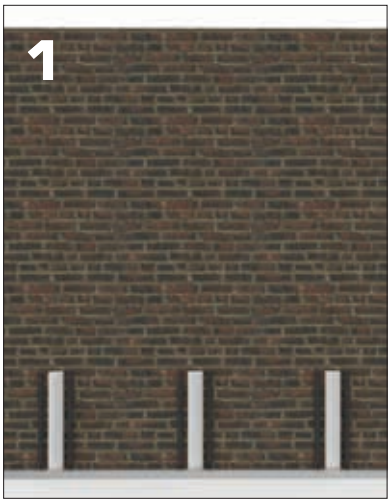

HPL

10 mm

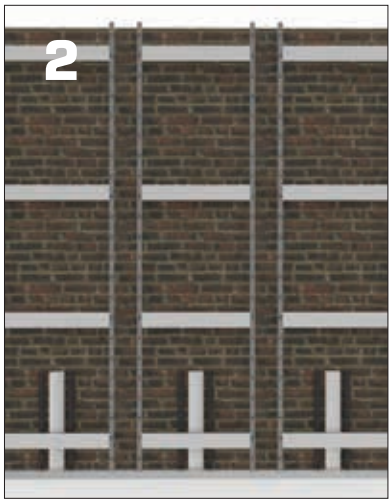

12 mm

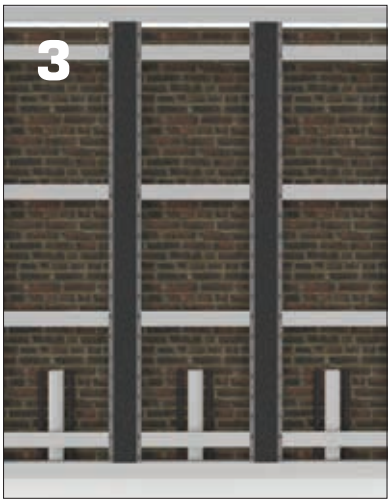

Installation:

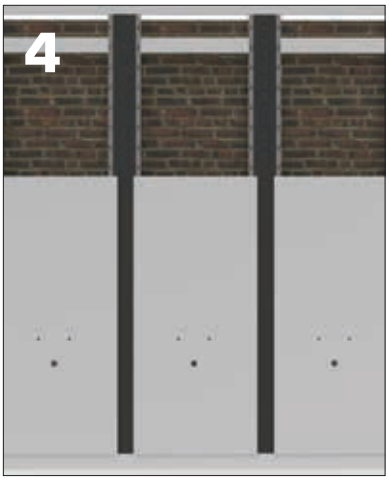

1. Level and mount the bottom profile to the floo .

2. Place the steel frames for cladding on the profile, align, and attach them to the masonry wall.

3. Connect the frames with „shadow" panels. Mount masking panels at the bottom and top.

4. Fit the cladding panels up to the height of the utilities and fixtures. For the cladding where fixtures will be installed, cut openings for the connections/fixtures

5. Secure and connect the fixtures to the cladding.

6. Install the remaining cladding.

Together, we create your dream interiors.

With our rich range of materials and decors, we create practically unlimited design and arrangement possibilities.

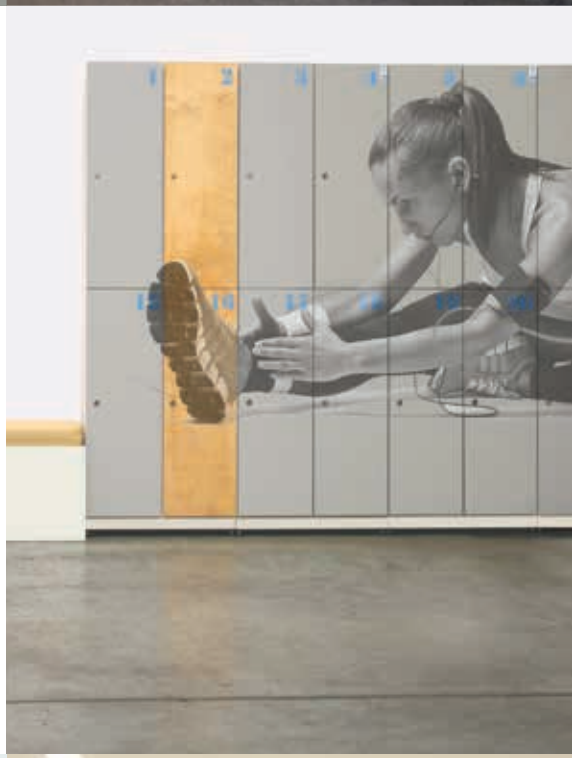

COLORS

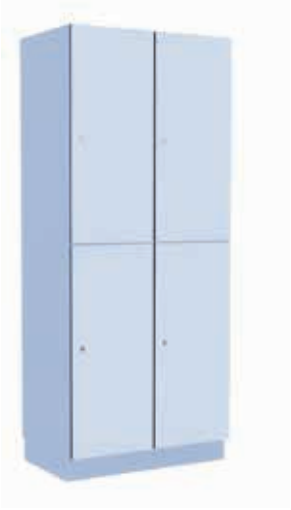

ALSANIT®

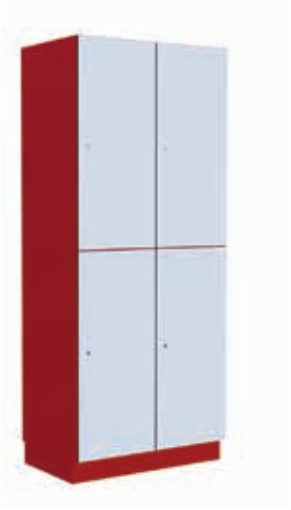

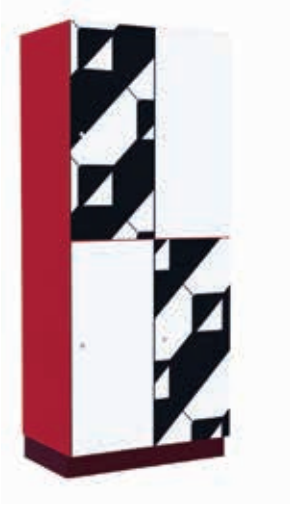

The STOCK version - at no extra cost

Take advantage of our extensive stock collection of available HPL, MFC, and GLASS, as well as metal paint, and configure furniture at no xtra cost. There are countless configuration possibilities.

The EXTENDED Version - extra charge

If you would like to have the furniture bodies made in colors other than those originally designated for bodies, there is an additional surcharge of +15%.

BESPOKE Version - custom color scheme upon individual request

In addition to non-standard board colors, we can also enrich the project with graphics or decals. If you wish for colors not available in our warehouse collection, you can choose any board color, paint, or decor from the available palette, and we will order it for you.

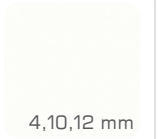

HPL + MFC - available from the ALSANIT board suppliers' collections
PAINT FOR METAL + GLASS - available from the RAL color collection
